Derwent Patent Citations Index Coverage by Authority

DPCI is the only editorially enhanced database available focusing on patent citations. DPCI includes enhanced patent citations data covering more than 721 million patent citations, and 72 million literature citations from over 32 different international patent-issuing authorities. In addition to the editorial process applied to DWPI records, DPCI comprehensively collates patent and literature citations at the invention level, verifying them for accuracy and correcting errors. This provides complete citation coverage for a single invention.
